Project Name: Cooling Tower Installation  
Project Address: 13920 S. Broadway St., Los Angeles (90061)  
Division Reference Number: LACO-05-016

Dear Mr. Madrigal:

The Department of Conservation's Division of Oil, Gas, and Geothermal Resources has received and reviewed the above referenced project application and submits the following recommendations.

If during construction, any additional wells are uncovered, please contact us immediately. Remedial plugging and reabandonment may be required.

The Division of Oil, Gas, and Geothermal Resources has no authority to review or comment on the design of oil and gas well vent systems, or their installation. Approval of well vent design is the purview of permitting agencies.

Division policy requires that soil contaminated by hydrocarbons shall be remediated or disposed of in accordance with local, state, or federal laws. If any saturated soil or seepage is detected during construction, please contact us immediately.

Enclosed are your copies of our Construction Site Plan Review. If you should have any questions, please call Robert Samuelian at (714) 816-6847. Your cooperation is appreciated.

PLAN REVIEW**

Applicant: Polymet, Inc.  
Project Name: Cooling Tower Installation  
Project Address: 13920 S. Broadway St., Los Angeles (90061)  
Division Reference Number: LACO-05-016

The staff of the Division of Oil, Gas, and Geothermal Resources has reviewed the attached project site plan and determined the following:

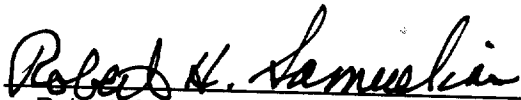

- A. The subject well has been abandoned or reabandoned to current standards (or equivalent) of the Division of Oil, Gas, and Geothermal Resources.
- B. The subject well was not abandoned to current standards, but no additional well work is required.
- C. The well is active, therefore, no abandonment is required at this time. Active wells must have adequate clearance and access for well workover equipment. We recommend that the well and associated equipment be enclosed with fencing in accordance with the provisions of Sections 1778 (a) and (e) of the California Code of Regulations, publication number PRC04.
- D. The required well work cannot be performed because the well could not be located.
- E. A well vent system approved by the permitting agency is recommended.
- F. A Division approved leak test has been completed.
- G. Other
